

Backyard Bird Scavenger Hunt!

An **ornithologist** is a scientist who studies birds. This goes far beyond just identifying differences between bird species. It could include questions about flight patterns, migrations, calls/songs, genetics, or like Dr. Jason Davis, stress and physiology! Let's practice some ornithology at home using the birds outside our windows. Can you complete this bird scavenger hunt? These birds are common in Appalachia!

1. Tufted Titmouse

2. American Goldfinch

3. House Finch

4. Northern Cardinal

5. Carolina Chickadee

6. Eastern Towhee

7. Song Sparrow

8. Carolina Wren

9. Eastern Bluebird

All photos used are from Cornell University's <https://www.allaboutbirds.org/news/>, an incredible resource for all your birding needs!
